DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Invention Group I, claims 1-4 and 7-8 in Paper No. 9 is acknowledged.

Specification

- 2. The disclosure is objected to because of the following informalities: the phrase "means 105 is operative to according to judge according to a result..." on lines 12-13 of page 11 is grammatically awkward. Appropriate correction is required.
- 3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kyoichi et al. ("Kyoichi", JP-10039981A).

As per claim 1, Kyoichi teaches a hypertext display apparatus for displaying a hypertext document, comprising:

Application/Control Number: 09/622,662 Page 3

Art Unit: 2174

display means (abstract; element 106) for displaying the hypertext document (abstract; HTML document);

selection means (abstract; element 108) for selecting an anchor on the hypertext document according to an instruction from a user;

analysis means for analyzing the hypertext document and for extracting anchor information,

attribute selection judgment means for judging according to outputs of said selection means and said analysis means whether or not an anchor having an attribute corresponding to said selection means is selected,

attribute activation judgement means for judging according to an output of the attribute selection judgement means whether or not an anchor having an attribute corresponding to said selection means is activated, and

acquisition means for acquiring from a server data, which is indicated by the anchor information, according to an output of said attribute activation judgement means (abstract).

Claim 2 is similar in scope to claim 1, and would have been rejected under similar rationale. Kyoichi also discloses focus moving means for moving focus to a location in a hypertext document, which is designated by anchor information selected by said selection means (abstract; moving to the link destination corresponding to the selection).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 09/622,662

Art Unit: 2174

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 3 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kyoichi et al. ("Kyoichi", JP-10039981A).

As per claims 3 and 7, Kyoichi does not explicitly disclose said selection means being a means allowing a user to depress a button/key to select an anchor. Official Notice is taken that the use of such a means, e.g. a mouse input device, is notoriously well known in the art. It would have been obvious to an artisan at the time of the invention to include such a selection means with Kyoichi's apparatus in order to provide users with a means for making a selection.

8. Claims 4 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kyoichi et al. ("Kyoichi", JP-10039981A) in view of Noguchi (US 5,983,184).

As per claims 4 and 8, Kyoichi does not teach the selection means to select an anchor by utilizing audio. Noguchi teaches a system for making selection of hyperlinks through voice input (abstract). It would have been obvious to an artisan at the time of the invention to

Art Unit: 2174

combine Noguchi's voice input feature with Kyoichi's apparatus in order to further facilitate user's navigation control for users with specific needs.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Inquires

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sy Luu whose telephone number is (703) 305-0409. The examiner can normally be reached on Monday - Thursday from 7:00 am to 4:30 pm (EST). The examiner can also be reached on alternate Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine Kincaid, can be reached on (703) 308-0640.

The fax number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
